Color System for Process Reliability

New color-coded siasponge ensures that you will never mix up sanding grits again. Each grit is easily identified by a corresponding color as detailed by the graphic below, thereby providing greater process reliability. In addition, siasponge 7990, 7991 and 7983 are all solvent-free due to our new manufacturing process. No solvent means no acrid odor and helps promote a better EHS working environment.
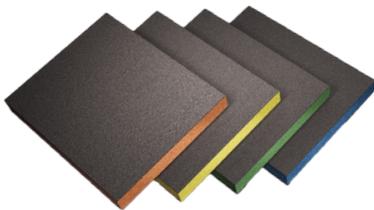

Applications:
• Keying wood, plastics or metal prior to application of paint
• Fine sanding of filler
• Sanding surfaces, curves, and profiles
• Keying without changing the surface shape

Advantages:
• Color coding for accurate grit identification
• No acrid solvent odor
• Highly flexible
• No folds, no kinks
• Does not become brittle
• Washable
• Consistent sanding pattern
• Suitable for highly versatile use on multiple surfaces including: plastics, composites, paints, varnishes, old lacquers, fillers, primers, wood
